

Decorative Products

Acrylic Primer Undercoat

A water thinned combined primer and undercoat with excellent adhesion and opacity, for use on all types of non-ferrous surfaces plaster, brick or cement but is particularly suitable for wood. Specially recommended for situations where speed of application, economy or low odour during the drying process is important.

Alkali Resisting Primer

An off-white primer of very low lead content for brush or spray application. Designed for cementitious type surfaces with an alkaline nature.

Aluminium Gloss

A superior alkyd topcoat providing a bright silver finish.

Aluminium Primer

A multi purpose primer. Particularly valuable in minimising "bleeding" on the more resinous types of timber. Formulated to seal knots and prevent resin seepage, This primer is ideal for both interior and exterior applications. The original self-knotting primer which for many years has proved the most successful product of its kind.

Contract Matt Emulsion

Ideal for general purpose interior decoration of wall and ceiling surfaces in a matt finish. Based on a vinyl copolymer emulsion and formulated to have outstanding opacity and ease of application together with good washability.

Flag Gloss

A superior alkyd topcoat. The product is ideally suited for kitchens and bathrooms, doors, window frames, furniture and woodwork in general. Also ideal for metal surfaces. Designed for top-class work where the highest standards of finish, durability and colour retention are required.

Flag Undercoat

A superior alkyd topcoat available in a wide range of colours. The product is ideally suited for kitchens and bathrooms, doors, window frames, furniture and woodwork in general. Also ideal for metal surfaces. It is easy to apply and provides excellent coverage.

Flag Vinyl Matt

Formulated to cover extremely well to be easy to apply and very easy to wash down after it has dried. Water-based, so brushes are easily rinsed out. Very tough and durable

Patent Knotting

Traditionally shellac based sealer for resinous knots on timber.

Red Oxide QD

General purpose product for use on iron and steel where rapid drying is essential.

Vinyl Satin Emulsion

A vinyl copolymer emulsion paint giving a subdued gloss or satin finish with outstanding toughness and durability. Intended for the decoration of walls and ceilings where maximum washability and resistance to wear and tear is required.

Wood Primer

Opaque white solvent thinned priming paint for woodwork which complies BS 5358: 1976. It is recommended for exterior woodwork where a high quality primer is required and freedom from lead essential. It may also be used on interior applications
