## Industrial / Special Purpose Paints

### **Anti Climb**

Designed to deter intruders, this paint never dries, which makes it very difficult to climb on. It is very difficult to remove from clothing.

### **Anti Ruginie**

High quality one coat anti-rust metal paint. Based on Micaceous Iron Oxide.

### **Black Bitumen**

A tough exterior quality paint. Highly water resistant with good resistance to diluted acids and alkalis. Also suitable as an inexpensive coating for ironwork.

### **Chlorinated Rubber**

Very hardwearing concrete paint. Suitable for road markings where high visibility and durability is a must.

### **Concrete Sealer**

Clear coating used to seal concrete floors and block paving driveways. Petrol and oil resistant. Based on a thermoplastic acrylic resin to give flexibility and UV resistance. Easy to apply and quick drying.

### **Emulsion Glaze**

A milk white emulsion which dries to a glass clear film. Suitable as a clear sealer on brickwork, plaster, cement etc. Can also be used as a clear finish over existing emulsion paints to produce a high gloss finish with improved washability. Specialist application for use in scenery production.

### **Flag Tile Paint**

A single component solvent based, one coat paint for ceramic tiles.

### **Flag Tile Paint (Clear)**

A single component solvent based, clear coat for use over Flag Tile Paint for extra durability.

### **Flagspeed Machinery Enamel**

High quality polyurethane enamel easy to apply. Excellent opacity, durability, and washability. General purpose product with rapid drying properties which permit short down times when painting machinery and rapid handling of components after painting.

### **Floor Paint**

Hard wearing polyurethane one pack paint designed to seal and colour concrete floors, enabling you to keep it clean and tidy. Petrol and oil resistant, this product is ideal for factory and garage floors. Excellent durability.

### **Floxstone**

For application on external greenhouse areas to prevent too much heat entering during summer months. Designed to harmlessly wash away during winter facilitating a more constant all year round temperature.

### **Paramose Paint & Varnish Remover**

Methylene chloride based general-purpose stripper for use on wood and metal.

### **Red Oxide QD**

General purpose product for use on iron and steel where rapid drying is essential.

### **Roofix 20-10**

Elastomeric acrylic based (non bitumastic) compound providing excellent flexibility and durability. Provides instant waterproofing for leaking roofs.
