

## UK. Paint maker bought out by management

Released 26/07/04

Press release:

The assets of CW Wastnage Ltd, makers of FLAG specialist paints and finishes and Flagship marine coatings have recently been purchased by the

management team. Led by Managing Director Tony Grover, the company is embarking on a plan of both expansion and rationalization.

"We have so many superb products such as our Flagship, Cruising and Trade Antifoulings, Bilge and Deck Paint that we need to concentrate on these products and take them to a wider audience" said Tony Grover. "We've already made new inroads back into the Middle East and are currently recruiting agents worldwide."

Built up over many years by the late Geoff Wastnage, the son of the founder, the company specializes in the manufacture and handling of solvent and water based coatings on 2 sites in Burnham-on-Crouch, Essex.
